

Hello

Dr. Simon Dennis

BVetMed, MVM, DECVIM (Cardiology)

Originally from the United Kingdom, Dr. Dennis is a board-certified cardiologist. He had the privilege to work as an academic cardiologist at both the Royal Veterinary College and the University of Pennsylvania School of Veterinary Medicine, and as a clinical cardiologist in the south of England, New York City and eastern Pennsylvania. He has a particular interest and expertise in echocardiography, the diagnosis and management of heart failure and congenital heart disease. Dr. Dennis enjoys all aspects of being a veterinarian and cardiologist. He loves dogs and cats equally and has had many pets over the years, each one a rescue animal.

Your pet's
experience
matters to us.
Your experience
matters to us.

We specialize in all aspects of cardiology and soft tissue, orthopedic, and neurologic surgery. The MLVS technicians have been hand selected because of their extensive experience in medicine, surgery, anesthesia, pain management and patient care. With years of experience and a team of pet-loving professionals, you can count on us!

CARDIOLOGY

What is a Veterinary Cardiologist?

Like humans, dogs and cats can be born with or acquire a variety of problems related to their heart. Veterinary Cardiologists diagnose and treat diseases of the cardiovascular system, which include the heart (valves, muscle, and electrical conduction system) and blood vessels. Our board-certified veterinary cardiologist is equipped with advanced diagnostic imaging techniques to identify the heart disease suspected in your pet. The results from these cardiovascular tests are used to create a treatment plan specifically tailored to your pet's condition.

Frequently Used Diagnostics:

Echocardiography

Ultrasound of the heart with 2D imaging, color flow Doppler, and spectral Doppler

Electrocardiography (ECG)

Evaluation of the electrical activity of the heart

Digital Radiology (X-Rays)

Holter ECG Monitoring

Blood Pressure Monitoring

Common Conditions Diagnosed & Treated:

Congestive Heart Failure

Valvular Heart Disease

Myocardial Disease (Cardiomyopathies)

Congenital Heart Defects

Arrhythmias

Pulmonary Hypertension
